Dear Mr Lockwood

**Re: Rose Energy Bio-Mass Power Station Ballyvannon Road, Glenavy  
Transport Assessment - Planning Ref: S/2008/0106**

I refer to your letter regarding the preparation of a Transport Assessment in support of the above planning application and would make the following comments.

- Translink operates an infrequent service 53 via Edenturcker Crossroads – details of which can be viewed on the Translink website at the link below:-

<http://www.translink.co.uk/present/ulb%5F53%5Fi.asp>

- Ulsterbus Services 103, 106 and 109/109A operate via Main Street, Glenavy which is approximately 2kms from Ballyvannon Road and outside the recommended walking distance to a bus stop.
- Translink would not suggest that extensions or diversions to the existing services are warranted by this development.

Should you require any further information do not hesitate to contact me.

Yours sincerely

Deirdre Watson  
Research Assistant
